This project was previously called the Regional and Rural Edition (RRE) to emphasize its focus on regional and rural recreation needs and priorities. This project name was used during the data collection, and community engagement and outreach phases which occurred primarily in 2021. As this report was being completed in 2022, DPR decided to rename the project the Parks Needs Assessment Plus (PNA+) to clarify and better communicate that this project complements and offers new information not previously included in the 2016 Parks Needs Assessment (PNA), such as mapping and analyses related to population vulnerability, environmental benefits, environmental burdens, and priority areas for environmental conservation, environmental restoration, regional recreation, and rural recreation. (Please note that there remains some text and graphic references to the RRE in this document because that was the project name when some components of this study were completed.)

» Environmental Conservation and Restoration Priorities

Note
This profile is not intended to stand alone. For definitions of key terms and a full description of the analysis summarized within please refer to Chapters 3 and 4 of the main report as well as Appendix C: Technical Resources.
STUDY AREA DESCRIPTION

LOCATION
The Westside Study Area includes many neighborhoods that comprise the westside of the City of Los Angeles, the cities of Beverly Hills, Culver City, Santa Monica, and West Hollywood, and several unincorporated areas including Franklin Canyon, West Fox Hills, Ladera Heights, View Park, Windsor Hills and Marina del Rey.

GEOGRAPHY
The western portion of the study area is comprised of a string of beaches and Marina del Rey. The study area contains one of the few remaining wetlands in Ballona Creek. The eastern portion of the study area includes the Baldwin Hills and Kenneth Hahn State Recreation Area, which provide natural areas and recreational opportunities for area residents. The northeast corner of the study area is Griffith Park. Marina del Rey is the largest, manmade small boat harbors in the country and is surrounded by the City of Los Angeles.

STUDY AREA ISSUES
Significant environmental resources exist in the study area, most notably the Ballona Wetlands, which are threatened by potential sea level rise due to climate change. The study area faces traffic congestion and housing affordability issues. Also, there is a need to protect the coastline and fish and wildlife resources in this area. Large portions of the area, including Marina del Rey, are located in a liquefaction zone. Marina del Rey is also in a tsunami hazard zone and is particularly susceptible to the negative impacts of climate change. In addition, most of Ladera Heights / View Park–Windsor Hills is in a Very High Fire Hazard Severity Zone. There is also a fault trace running through this community. In addition, the study area includes a large urban oil field in Baldwin Hills.

Traffic congestion is one of the biggest issues facing the study area. The Metro E Line (Expo) runs through Culver City to the westside of the City of Los Angeles, but the popular and populous northern areas are not served by rail transit. Another issue is the relatively high cost of land and housing. The study area is seen as a desirable place to live and do business, but there is little land for new development and costs are high. Large sections of the study area have higher density residential populations which increase the demand on existing open space and recreation.

PARK AND RECREATION RELATED ISSUES

» Several communities located within the Westside Regional Study Area were identified as having Very High Park Need based on the 2016 Countywide Parks Needs Assessment. These study areas include Hollywood – South, Palms - Mar Vista - Del Rey, Venice, West Adams, West Hollywood and Westwood / Unincorporated Sawtelle VA Center.

» A growing demand for outdoor recreation has resulted in overcrowding at some well-known recreation sites, such as the Baldwin Hills Scenic Overlook.

» While the coastal and mountain portions of the study area provide opportunities for nature-based recreation, the central neighborhoods are not as well-served. The Expo Corridor Bike Path and the Park to Playa Trail help to bridge this gap by providing opportunities for active recreation and better access to parks and open spaces.

» This study area has a low mileage of trails and has few opportunities to create new ones because it is highly urbanized.
ANALYSIS FINDINGS

» The most vulnerable populations are largely concentrated in the eastern part of the study area, including the Hollywood, Mid City, and Hyde Park neighborhoods.

» The regional recreation facilities and trails in the area are relatively well served by public transportation due to an extensive transit network.

» The area’s recreation facilities experience a high rate of visitorship concentrated around Griffith Park and the Baldwin Hills parklands, including Kenneth Hahn State Recreation Area.

» Areas with the highest Regional Recreation Need include neighborhoods surrounding Los Angeles International Airport due to its low visitorship levels and Mid City/Hollywood due to its vulnerable populations.

» Only a few areas have been identified as priority areas for conservation, such as portions of the Pacific Palisades and Marina Del Rey.

» Several areas, including West Adams, Westchester, Hollywood, and the Inglewood Oil Field have been identified as priority areas for restoration due to their relatively poor environmental health.

» The study area only has 0.26 miles of regional trails per 1,000 residents, which is below the countywide average of 0.33.

COMMUNITY ENGAGEMENT THEMES

» Lack of information, distance, overcrowding and limited park space and programs, safety and limited transit options are identified barriers to park use for residents who live in the study area.

» Residents say they need more swimming facilities, nature centers, park and green spaces, dedicated use trails, outdoor event and community gathering spaces, and more and affordable programming.

» Half of survey respondents say they are recreating outside more and 87% are looking to do that closer to home because of COVID.

POPULATION VULNERABILITY DIMENSIONS

Social Barriers Dimension
Indicators:
» High Poverty Rate
» High Unemployment Rate
» Majority-Minority Population
» High % of Young Children
» High % of Elderly Residents
» High % of Non-English-Speaking Residents
» Low % of Two-Parent Households

Transportation Barriers Dimension
Indicators:
» Low Automobile Access
» Low Public Transit Access
» Low Active Commuting Rate
» High Traffic Density
» High Pedestrian Injuries

Health Vulnerability Dimension
Indicators:
» Low Park Access
» Low Tree Canopy
» High % Impervious Surface
» High Number of Excessive Heat Days
» High Urban Heat Island Index Score

Environmental Vulnerability Dimension
Indicators:
» Reduced Life Expectancy at Birth
» High Pollution Levels

CONSERVATION AREAS
OTHER PUBLIC AND SEMI-PUBLIC OPEN SPACE

26 acres of regional facility land per 1,000 residents
ENVIRONMENTAL BENEFITS

INDICATORS

Species Diversity. Species diversity data represent a count of the number of different species for amphibians, aquatic macroinvertebrates, birds, fish, mammals, plants, and reptiles.

Significant Habitat. Significant habitat values represent terrestrial habitats or vegetation types that are the focus of state, national, or locally legislated conservation laws, as well as key habitat areas that are essential to the survival and reproduction of focal wildlife species.

Habitat Connectivity. Habitat connectivity values summarize information on the presence of mapped terrestrial corridors or linkages and juxtaposition to large, contiguous, natural areas.

Proximity to Waterbody. Proximity to waterbody represents the distance to a water drainage network of the US. Proximity was categorized as less than 0.1 mile (highest benefit), 0.1 to 0.25 mile, 0.25 to 0.5 mile, 0.5 - 1.0 mile, or greater than 1.0 mile (lowest benefit).

Habitat Type. Habitat types are divided into natural vegetation (high score), agriculture/barren/other (low score), and urban (lowest score).
ENVIRONMENTAL BURDENS

**INDICATORS**

**Groundwater Threat.** Groundwater threats come from many sources, including storage and disposal of hazardous materials on land and in underground storage tanks, dairy farms, concentrated animal-feeding operations, and water ponds generated for oil and gas development also pose threats to groundwater reserves.

**Hazardous Waste.** Hazardous waste facilities and generators pose widespread concerns for both human health and the environment from sites that serve to process or dispose of hazardous waste.

**Drinking Water.** Drinking water contaminants are introduced into drinking water sources in many ways, including natural occurrence, accidental discharge, industrial release, agricultural runoff and certain water disinfection methods.

**PM2.5.** Fine particulate matter (PM) that measures 2.5 microns or less in width represents a major contributor to air pollution and has been shown to cause significant adverse health effects, including heart and lung disease.

**Pollution Burden.** Pollution burden is composite indicator derived from seven exposure indicators (ozone and PM2.5 concentrations, diesel PM emissions, drinking water contaminants, children’s lead risk from housing, pesticide use, toxic releases from facilities, and traffic density) and five environmental effects indicators (cleanup sites, impaired water bodies, groundwater threats, hazardous waste facilities and generators, and solid waste sites and facilities).

Kenneth Hahn State Recreation Area

VITAL STATISTICS

DESCRIPTION
Kenneth Hahn State Recreation Area and the adjacent Rueben Ingold Park, Norman O. Houston Park, and Stocker Corridor are located between downtown Los Angeles and LAX. This area includes large areas of native coastal sage scrub habitat, lawns and landscaped areas, picnic sites, tot lots, fishing lake, lotus pond, community center and miles of trails, including portions of the Park to Playa Trail.

Aubrey E. Austin Jr. Park and North Jetty

**Description**

Aubrey E. Austin Jr. Park and North Jetty is located in Marina del Rey, CA. There is a paved walkway that goes out to the ocean at the end of the north jetty that is a favorite spot among joggers and fishermen. Beachgoers can walk along the jetty to reach the Marina peninsula. There is also a quiet spot overlooking the Marina lagoon. Both the jetty walkway and the overlook for the Marina lagoon are stroller and wheelchair-accessible.

**Key Park Amenities**

- Paved Pathway
- Fishing Areas

## COMMUNITY ENGAGEMENT THEMES

### BARRIERS RESIDENTS EXPERIENCE TO USING REGIONAL PARKS AND FACILITIES

<table>
<thead>
<tr>
<th>Theme</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>LACK OF SHADE</strong></td>
<td>Not enough shade in parks and at facilities, especially near gathering spaces and seating areas.</td>
</tr>
<tr>
<td><strong>DISTANCE</strong></td>
<td>Many park amenities are not available nearby.</td>
</tr>
<tr>
<td><strong>LACK OF TRANSIT</strong></td>
<td>Public transit to parks is limited, and there are few options for carpooling or shuttles.</td>
</tr>
<tr>
<td><strong>LACK OF PARKING</strong></td>
<td>Not enough parking at some parks and facilities.</td>
</tr>
<tr>
<td><strong>COST</strong></td>
<td>Fees to enter and/or park at some parks and facilities or rent equipment is too expensive for low income families.</td>
</tr>
<tr>
<td><strong>LACK OF INFORMATION</strong></td>
<td>Residents do not know where parks are located, what facilities are available, or how to use and get to amenities.</td>
</tr>
<tr>
<td><strong>TOO CROWDED</strong></td>
<td>Not enough facilities to meet demand, so popular parks and trails are often crowded.</td>
</tr>
<tr>
<td><strong>SAFETY</strong></td>
<td>Concerns about unhoused people in parks and natural areas, using parks alone, as well as pandemic safety precautions like social distancing in parks and along popular trails.</td>
</tr>
<tr>
<td><strong>POLLUTED WATERWAYS</strong></td>
<td>Rivers, lakes, beaches and other waterways are sometimes off limits due to high bacteria levels or sewage spills.</td>
</tr>
<tr>
<td><strong>LIMITED ADA ACCESSIBILITY</strong></td>
<td>Facilities are not accessible to disabled and older residents.</td>
</tr>
<tr>
<td><strong>LIMITED STAFF</strong></td>
<td>Not enough parks staff to share information and provide security and needed maintenance.</td>
</tr>
<tr>
<td><strong>NOT ENOUGH MAINTENANCE AT PARKS AND FACILITIES</strong></td>
<td>Park facilities and trails need repairs, maintenance and restoration.</td>
</tr>
<tr>
<td><strong>LACK OF CONNECTIVITY</strong></td>
<td>Not enough trail networks or safe biking and pedestrian options.</td>
</tr>
<tr>
<td><strong>LIMITED HOURS</strong></td>
<td>Facilities are not open when people can use them.</td>
</tr>
<tr>
<td><strong>LACK OF RECREATION FACILITIES</strong></td>
<td>There are not enough regional park space, swimming facilities and community gathering spaces.</td>
</tr>
<tr>
<td><strong>LACK OF OUTDOOR RECREATION AREAS</strong></td>
<td>Including trails, pet-friendly areas, campsites, nature centers and affordable water-based recreation.</td>
</tr>
<tr>
<td><strong>LACK OF NEARBY GREENSPACE</strong></td>
<td>Many residents live in park-poor communities and cannot access parks or greenspaces near to where they live.</td>
</tr>
</tbody>
</table>

“Seniors need more activities.”

“Will Rogers trails parking closes at sunset, which limits parking revenue, and means people park on the residential streets.”

“The bike path along Ballona Creek from Del Rey to Marina del Rey is not very safe for pedestrians to walk on.”
Residents Regional Parks Use and Activities

I visit these types of regional parks and facilities the most…

- Boating/Watersport Facilities: 57%
- Swimming Areas: 54%
- Shooting Ranges: 50%
- Campsites: 45%
COMMUNITY ENGAGEMENT THEMES
COMMUNITY SUGGESTIONS TO INCREASE AND IMPROVE VISITS TO REGIONAL PARKS AND FACILITIES

MORE SHADE
More shade structures and trees in gathering and playground spaces.

ACCESS TO WATER
Water fountains for users and animals in parks and along trails, more splash pads and water features for cooling off, better access to lakes, and waterways, and restoration of area wetlands.

TRANSIT OPTIONS
Provide free and more frequent transit and shuttles to the beach and to parks.

ADDRESS PARKING AND CONGESTION
Provide incentives for carpooling and review parking options at popular facilities.

ENHANCED SAFETY MEASURES
Provide more patrols on trails and at parks and facilities. Ensure visitors are adhering to social distancing and other protective measures during the pandemic.

ADDRESS HOMELESSNESS
Expand services to support unhoused people who use parks and endanger wildlife habitats.

IMPROVED SIGNAGE
Provide additional and interactive wayfinding, interpretive and multilingual signage in parks and along trails.

ADA ACCESSIBILITY
Provide wheelchair and disabled accessible trails and facilities, including restrooms.

EXPAND NATIVE AMERICAN ACCESS AND FACILITIES
Provide access to ceremonial spaces for gatherings and events and provide spaces for indigenous-led education centers and activities.

EXPAND COMMUNITY EVENTS
Open up park spaces for the community to hold more events.

IMPROVED MAINTENANCE AND INFRASTRUCTURE
Clean and maintain restrooms, trails and campsites, provide more picnic tables and seating.

ADDITIONAL STAFF
Hire staff that is more representative of the population to guide visitors and maintain trails and parks.

BETTER ACCESS TO PROGRAMS
Improve and standardize the online reservation system, gather community input to improve the variety of recreation classes, and provide affordable equipment and classes for all ages, especially youth and seniors.

MORE RECREATION FACILITIES
Extend facilities hours, provide more restrooms, bike parking, outdoor equipment and gathering spaces, and build additional parks, courts, sports fields, and walking/jogging trails.

EXPAND CONCESSIONS
Provide more concessions with healthy food options at parks and facilities.

DEDICATED USE TRAILS
Provide more and separate trails for hiking, biking, equestrian use to help mitigate conflict and increase safety for all users along trails.

ENHANCE CONNECTIVITY
Provide greenways and trail networks that connect communities, parks and provide safe transportation corridors for bicyclists, equestrians and pedestrians.

EXPAND AND PRESERVE GREENSPACE
More trees, pocket parks, native habitat areas, nature centers, learning gardens, and natural open spaces with native and regenerative landscaping for passive recreation and viewing wildlife.

PARTNERSHIPS WITH COMMUNITY ORGANIZATIONS
Expand park use and greenspace access through school and community partnerships.
“Some bike trails flooded with walkers. Maybe two trails needed in some areas.”

“The LA River park could be a major improvement for the west LA area!!”

“The wooden walkways over the Santa Monica beaches are a great asset and increase access for all. Let’s have more.”

“We need a large regional park on the westside. Space is an issue and will be more difficult in the future. We need to set aside space now.”

“Ballona Wetlands Ecological Reserve … is an important and special area for migrating and resident birds. There are no longer many open areas near the water. The human camping and trashing this area is a tragic abuse of this place. It is heartbreaking to see the loss and abuse of this open ecological place… The homeless encampments are sad for everyone: the homeless people, for the non-homeless people, and for the birds, other animals, and plants with who we need to share the limited spaces.”

“To help address the lack of regional park space are are fortunate that the Santa Monica Airport will be closing in 2028 and that Santa Monica residents have voted to earmark that land for park use. How can LA County help?”
APPENDIX A | Westside

REGIONAL RECREATION PRIORITY ANALYSIS

Areas Experiencing the Highest Levels of Barriers and Vulnerability

Legend
- Areas of Moderate to High Vulnerability Across All Four Dimensions
- Westside Regional Study Area
- Los Angeles County
- Major Roads

High Levels of Social and Transportation Barriers

High Levels of Health and Environmental Vulnerability

Map source: HPI, 2021; 2021 RRE Inventory

Areas Located in Low Proximity to Regional Recreation Sites

Legend
- Areas in Low Proximity to Regional Recreation Facilities (beyond a 2.5-mile bicycle ride to any Regional Recreation Park Entry Points, Nature-Based Recreation Area Entry Points or Trailheads and Access Points)
- Regional Site Inventory
- Westside Regional Study Area
- Los Angeles County
- Major Roads

Low Proximity to Regional Recreation Sites

Map source: ArcGIS StreetMap Premium, 2021; 2021 RRE Inventory

Areas With Low Visitorship Rates to Regional Recreation Sites

Legend
- Areas with Low Visitorship Rates (less than one observed visit per resident over the two-year period)
- Westside Regional Study Area
- Los Angeles County
- Major Roads

Low Visitorship Rates to Regional Recreation Sites

Map source: Unacast, 2021; 2021 RRE Inventory
REGIONAL RECREATION PRIORITY AREAS

Areas with:
- High Levels of Social and Transportation Barriers
- High Levels of Health and Environmental Vulnerability
- Areas of High Regional Recreation Priority
- Low Proximity to Regional Recreation Sites
- Low Visitorship Rates to Regional Recreation Sites

Map source: HPI, 2021; Unacast, 2021; ArcGIS StreetMap Premium, 2021; 2021 RRE Inventory
ENVIRONMENTAL CONSERVATION AND RESTORATION PRIORITY AREAS

Priority Areas for Conservation

Priority Areas for Restoration

Legend
- Areas of Highest Environmental Benefit
- Metro Regional Study Area
- Los Angeles County
- Major Roads

Legend
- Areas of Highest Environmental Burden
- Metro Regional Study Area
- Los Angeles County
- Major Roads
